IOPLL Intel FPGA IP Core Release Notes

If a release note is not available for a specific IP version, the IP has no changes in that version. For information on IP update releases up to v18.1, refer to the *Intel® Quartus® Prime Design Suite Update Release Notes*.

IP versions are the same as the Intel Quartus Prime Design Suite software versions up to v19.1. From Intel Quartus Prime Design Suite software version 19.2 or later, IP cores have a new IP versioning scheme.

The IP version (X.Y.Z) number may change from one Intel Quartus Prime software version to another. A change in:

- X indicates a major revision of the IP. If you update your Intel Quartus Prime software, you must regenerate the IP.
- Y indicates the IP includes new features. Regenerate your IP to include these new features.
- Z indicates the IP includes minor changes. Regenerate your IP to include these changes.

IOPLL Intel FPGA IP v19.3.1

Table 1. v19.3.1 2020.09.28

Intel Quartus Prime Version	Description	Impact
20.3	Added support for IP-XACT file generation for Intel Stratix® 10 and Intel Agilex™ devices. You can use the IP-XACT files to determine addresses of reconfigurable bits in the IOPLL IP core.	—

IOPLL Intel FPGA IP v19.3.0

Table 2. v19.3.0 2019.09.30

Intel Quartus Prime Version	Description	Impact
19.3	Added support for Intel Agilex devices.	—

Intel Corporation. All rights reserved. Agilex, Altera, Arria, Cyclone, Enpirion, Intel, the Intel logo, MAX, Nios, Quartus and Stratix words and logos are trademarks of Intel Corporation or its subsidiaries in the U.S. and/or other countries. Intel warrants performance of its FPGA and semiconductor products to current specifications in accordance with Intel's standard warranty, but reserves the right to make changes to any products and services at any time without notice. Intel assumes no responsibility or liability arising out of the application or use of any information, product, or service described herein except as expressly agreed to in writing by Intel. Intel customers are advised to obtain the latest version of device specifications before relying on any published information and before placing orders for products or services.

IOPLL Intel FPGA IP v18.0

Table 3. v18.0 May 2018

Description	Impact
Renamed Intel FPGA IOPLL IP core to IOPLL Intel FPGA IP core as per Intel rebranding.	—
Added new settings to reduce jitter peaking: charge pump current, loop resistance, and ripplecap settings.	—
Added a new GUI parameter: Create a permit_cal signal to connect with an upstream PLL to export the permit_cal input.	—
Added a new input signal: permit_cal. Connecting this permit_cal port to the locked output port of the upstream I/O PLL ensures that the cascaded I/O PLLs are calibrated in the correct order.	—
Improved compensation accuracy.	—
Decreased IP simulation time.	—

Intel FPGA IOPLL v17.1

Table 4. v17.1 November 2017

Description	Impact
Added support for Intel Stratix 10 and Intel Cyclone® 10 GX devices.	—
